Streamline bookings and generate revenue

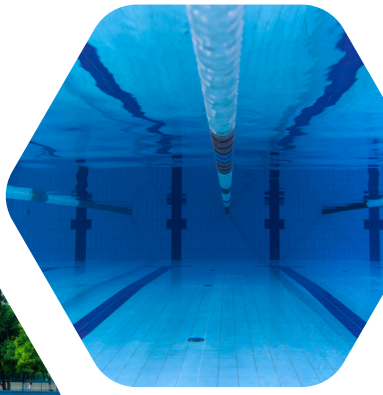

Manage bookings to maximise your school income

Smart-Booker is a booking system that enables schools and colleges to manage room, facilities, equipment, and hospitality bookings for both internal and fee-paying customers. With an extremely easy-to-use interface, comprehensive reports and detailed booking calendars, it gives your organisation a quick and easy way to manage all bookings, payments and communications.

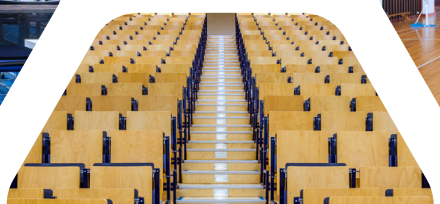

Smart-Booker works like an extra staff member of your organisation who solely takes care of revenue generation: it is an automated tool that generates income out of your unused facilities and equipment. It can either be used as a stand-alone booking system or integrated with other services from WisePay, providing central reconciliation across all income received.

Powered by WisePay
Smart-Booker is powered by WisePay, a payments platform that helps educational institutions reach their full potential. School payments are made easy and taken to the next level thanks to our wide range of modules, which include income generation, parental engagement, and general school management solutions. Find out more about WisePay on our website to let go of cash and give your staff, students, and parents a more enhanced experience at your school.

Did you know?
On average, our schools turn over £72,000 every year by using Smart-Booker to rent out equipment, catering, theatre halls, IT facilities, playing fields and sports facilities like tennis courts, swimming pools, and football pitches. Smart-Booker pays for itself quickly, providing a service to your local community and an easy way for your school to make money.

Unique Smart-Booker features

Consent forms and safety
Consent forms and data can be collected with each booking as your organisation requires.

Comprehensive reporting
All payments are easily reconciled, and calendar-based reports show all bookings at a glance.

Promote and communicate
Built-in email and text options with automatic distribution lists based on customers' booking history.

Built-in CRM
Schools and colleges can manage their external customers easily within Smart-Booker.

MIS integration
Automatic sync with all leading MIS providers means your student and staff database is always updated.

Adaptable booking options
Manage multiple booking types depending on your organisation's facilities and your users' needs.

Finance system integration
As well as built-in finance reports, Smart-Booker integrates with most finance systems via API.

Permission-based access
Control which information is accessible to different staff, from finance to catering staff.

Multiple payment options
Choose whether to take online payments, automatically generate invoices, manage paid memberships, promotional discounts, zero-payment bookings and many more options.
